Heritage Portfolio Morningstar and FE Risk Scores

The Morningstar Portfolio Risk Score (MPRS) measures the overall risk of portfolios, including client portfolios, model portfolios, and fund portfolios. MPRS uses Morningstar Risk Model's holdings-based analysis to derive a risk estimate and score for each portfolio, and Morningstar's multi-asset Target Allocation Indexes to define the following risk ranges: Conservative: 0-24, Moderate: 24-48, Aggressive: 48-79, Very Aggressive: 79-100, Extreme: 100+.

FE Fundinfo Risk Scores defines risk as a measure of volatility relative to an index of the 100 largest UK companies (the FE Risk Score benchmark) which has a risk rating of 100 and is rebased to sterling. Instruments more volatile than this benchmark have a score above 100 and vice versa giving a reliable indication of risk.
